REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

The Board of Directors
Emirates NBD Securities LLC
Dubai
United Arab Emirates

Introduction

We have reviewed the accompanying condensed statement of financial position of **Emirates NBD Securities LLC** (the "Company"), **Dubai**, **United Arab Emirates** as at 31 March 2024 and the related condensed statements of comprehensive income, cash flows and changes in equity for the three months period then ended and material accounting policy information and other explanatory notes. Management is responsible for the preparation and presentation of this interim financial information in accordance with International Accounting Standard 34 *Interim Financial Reporting* ("IAS 34"). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity ("ISRE 2410"). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects in accordance with IAS 34.

11 FAIR VALUE MEASUREMENT PRINCIPLES

Fair values

Fair values versus carrying amounts

The fair values of the financial instruments are not materially different from their carrying amounts.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value of financial instruments classified as level 3 are, in certain circumstances, measured using valuation techniques that incorporate assumptions that are not evidenced by the prices from observable current market transactions in the same instrument and are not based on observable market data. The Company employs valuation techniques, depending on the instrument type and available market data. For example, in the absence of active market, an investment's fair value is estimated on the basis of an analysis of the investee's financial position and results, risk profile and other factors. Favorable and unfavorable changes in the value of financial instruments are determined on the basis of changes in the value of the instruments as a result of varying the levels of the unobservable parameters, quantification of which is judgmental.

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS FOR THE THREE MONTHS PERIOD ENDED 31 MARCH 2024 (UNADUITED)

12 INCOME TAXES AND DEFERRED TAXATION

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company operates and generates taxable income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be settled with the tax authorities.

Deferred tax is accounted for using the asset and liability method. Deferred tax assets and liabilities are recognised for the full tax consequences of all temporary difference between the Company financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Recognition of deferred tax are, however, restricted to the extent that it is probable that sufficient taxable profits will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured using tax rates that are expected to apply to the period in which the asset is expected to be realised or the liability is expected to be settled.

Deferred tax assets are reviewed periodically to reduce the carrying amount by the extent to which it is no longer probable that sufficient taxable profits will be available to utilise the differences.

Deferred tax assets and liabilities are off set when there is legally enforceable right to set off current tax asset against current tax liabilities and when they relate to income taxes levied by the same tax authorities and the Company intends to settle its current tax assets and current tax liabilities on a net basis.

Corporate Tax in UAE

On 9 December 2022, the United Arab Emirates (UAE) Ministry of Finance ("MoF") released Federal Decree-Law No 47 of 2022 on the Taxation of Corporations and Businesses, Corporate Tax Law ("CT Law") to enact a new CT regime in the UAE. The new CT regime has become effective for the accounting periods beginning on or after 1 June 2023.

The taxable income of the entities that are in scope for UAE CT purposes will be subject to the rate of 9% corporate tax. It is not currently foreseen that the Company's operations will be subject to the application of the Global Minimum Tax rate of 15% in 2024. The application is dependent on the implementation of Base Erosion Profit Shifting (BEPS 2) – Pillar Two rules by the countries where the Company operates and the implementation of a top-up tax regime by UAE MOF.

The tax charge for period ended 31 March 2024 is AED 322 thousand, representing effective tax of 9% (31 March 2023: 0%).
